

BASED TRAINING on **HALAL LOGISTICS** in SUPPLY CHAIN MANAGEMENT

SUMMARY

This 1-day program equips participants with key practical knowledge in Halal logistics, supply chain management, and regulatory compliance. Participants will master fundamental Shariah principles, Halal hub operations, customs clearance procedures, and Malaysia Halal certification standards to minimize risks and ensure food integrity across cross-border supply chains.

OBJECTIVES

- ✓ Emphasize and develop competency in Halal logistics to ensure proper Halal integration within Malaysia's growing industry.
- ✓ Provide theoretical understanding and practical mechanisms regarding the anatomy of Halal service systems, addressing existing literature gaps.
- ✓ Educate operational employees on Halal logistics service provisions, food integrity, packaging, warehousing, and basic implementation needs.
- ✓ Train employees who operate overhead equipment and lack prior background in Halal or general logistics with fundamental industry knowledge, customs procedures, and quality standards.

**LET'S MOVE
BUSINESS FORWARD.**
