

BASIC TRAINING ON LOGISTICS AND OPERATIONS MANAGEMENT

[LOGISTICS FOCUS]

SUMMARY

This 2-day program delivers advanced knowledge in logistics while integrating essential material management practices to ensure end-to-end supply chain efficiency. Participants will explore transportation, warehousing, and distribution alongside material planning, inventory control, and risk management, enabling a balanced approach to cost optimization and operational excellence.

OBJECTIVES

- Strengthen advanced logistics planning and execution capabilities
- Integrate material management into logistics decision-making
- Improve inventory control and material flow efficiency
- Apply cost optimization and performance measurement tools
- Enhance resilience through risk and disruption management

TOPICS

- Logistics & Material Management Overview
- Logistics Network Design
- Transportation Management
- Freight Cost Optimization
- Material Planning & Inventory Control
- Warehouse & Material Handling Systems
- Distribution & Material Flow Strategies
- Logistics & Inventory Performance Metrics
- Material Risk & Obsolescence Management
- Demand Planning & Material Requirements
- Technology in Logistics & Materials
- Global Logistics & Material Flow
- Supplier, Procurement & Inventory Alignment
- Lean Logistics & Lean Material Management
- Sustainable Logistics & Materials
- Cost Reduction in Logistics & Inventory
- Data-Driven Logistics & Inventory Control
- Disruption & Supply Continuity Management

TRAINING DETAILS

- ✓ Date : 3rd - 4th June 2026
- ✓ Venue : Wisma JOFFA
- ✓ Location : 71, Jalan Jaya Mas 1, Taman Jaya Mas 81300, Skudai, Johor.
- ✓ Price : RM 900.00 (per pax)
- ✓ Meals and Certificate of Attendance will be provided.
